We marked this year’s landmark 30th anniversary with the completion of several achievements. This included the launch our new brand and the reiteration of our core values: Passion, Expertise, Respect and Care. Our values not only shape the character of our company, but define how we behave and operate as an organisation. They also function as the backbone for our CSR strategy which we formalised this year with the establishment of our CSR committee and board.

We recognise that sustainable, ethical operations are crucial to our future success. We take a long view of CSR and holistically examine our actions in the workplace, marketplace, in the communities where we operate and our human rights record and environmental initiatives.

On a community level, local management continues to drive employee volunteering and charitable endeavours. This report covers 114 of such activities where employees gave over 5,700 hours of their time. Key efforts include:

**Ebola outbreak support:** We opened our dedicated Ebola website and App to the general public. It became a trusted source of accurate educational information on the epidemic with news on the outbreak, travel advice and educational materials translated into more than 24 languages.

**World Malaria Day campaign:** We have helped protect over 3,000 children from malaria by purchasing bed nets through United Against Malaria’s bracelet campaign. In African countries where we operate and malaria is endemic, we ran educational seminars and provided posters, videos and leaflets on how to prevent and treat the disease.

**Eradicating yaws:** Together with Newcrest Mining in Papua New Guinea and the Centre for International Health Research of Barcelona, our ground-breaking research published in the New England Journal of Medicine, examined strategies to eradicate the tropical disease yaws.

**Kokoda Track Foundation (KTF):** Providing $USD 105,000 to fund a First Aid Post in Papua New Guinea and an educational scholarship at the University of Melbourne.

**Disease outbreak management:** Our research project with USAID, Chatham House and extractive industries help bring public and private partners together to tackle these great health challenges facing both government and industry alike.

Our philosophy continues to prioritise ‘Healthcare and Education’ to promote wellness in the workplace and support the communities where we operate. As we help our clients mitigate their medical and travel security risks, we try our best to lead by example by fulfilling our own Duty of Care responsibilities towards our employees. We use appropriate cross-border travel procedures, encourage vaccinations and preventative health measures, employ our TravelTracker software and Assistance App, and require employee online learning to keep our workforce safe and healthy.

We are committed to reducing illness, accidents and injuries at every one of our locations. All employees, regardless if they are medical professionals, are required to receive CPR and AED training. As heart disease causes one in four deaths in many parts of the world, this essential training can save many lives. With 30 years of history, we aim to be in business for many years to come. To this point, our Global Quality Charter was established to ensure continued excellence in the delivery of assistance services. In 2013, all 27 of our Assistance Centres and operations platforms achieved full ISO 9001:2008 certification.

With 11,000 employees in over 90 countries, encouraging sound ethical conduct, cultural diversity, human rights, fair hiring and equitability is more important than ever before. Our Code of Conduct and Individual Rights policies continue to map out how we behave and act as a company.

Lastly, environmental stewardship is important. We follow the standards set out by our environmental policy to reduce use of electricity consumption and use of paper. Where it is feasible, we recycle paper, plastics and electronics equipment.

We have made so much progress to integrate CSR into our operations. However, we are just at the beginning. Continuous improvement and refinement is always in order so we can continue to comply with and exceed high ethical and sustainable standards.
About INTERNATIONAL SOS

International SOS is the world’s leading medical and travel security risk services company. We care for clients across the globe, from more than 850 locations in 92 countries.

Our expertise is unique. More than 11,000 employees are led by 1,400 doctors and 200 security specialists. Teams work night and day to protect our members. We pioneer a range of preventive programmes strengthened by our in-country expertise. We deliver unrivalled emergency assistance during critical illness, accident or civil unrest. We are passionate about helping clients put ‘Duty of Care’ into practice. With us, multinational corporate clients, governments and NGOs can mitigate risks for their people working remotely or overseas.

Our Mission and VALUES

Our mission is to pioneer the international medical & travel security risk services sector.

OUR VALUES

• Passion: We work with passion, entrepreneurial spirit and teamwork to serve our clients and people.
• Expertise: We are committed to apply our professional expertise to deliver the highest quality of service to our clients.
• Respect: We treat all our global, diverse stakeholders with respect and deliver on our commitments with the highest integrity to earn trust.
• Care: We compassionately care about the interest of our clients, members and employees to make a real difference in people’s lives, globally.

Corporate OVERVIEW

This report comprises the corporate social responsibility activities of International SOS, its subsidiaries and brands including: MedSupply International, RMSI, MedAire, IHC and Aspire Lifestyles for July 2013 to January 2015.

CORPORATE SOCIAL RESPONSIBILITY

Every day our employees strive to:
• Promote responsible and ethical behaviour
• Drive our business goals in a socially responsible manner.

Corporate social responsibility is our core business. It is key to helping our clients achieve their Duty of Care responsibilities.

Clients
• 10,000 corporate clients
• 61% of Fortune Global 500 companies

Sectors
• Corporate (Finance, Technology, Healthcare, Manufacturing, etc.)
• Oil & gas
• Offshore
• Mining
• Infrastructure
• Luxury yachts
• Aviation
• Maritime
• Non-profit
• Government
• Scholastic

KEY SERVICES

We provide integrated medical and security risk prevention and management services.

Other services include:
Concierge and customer-care solutions.

WORLDWIDE REACH, HUMAN TOUCH.
What Corporate Social Responsibility MEANS TO US

Our corporate social responsibility activities demonstrate a commitment to maintaining globally sustainable operations. Our corporate citizenship focus is on ‘Healthcare and Education’ to look after the wellbeing of our employees and the communities around which we operate. These areas reflect our core expertise and are where we can make the largest impact. Ethical conduct in our dealings with suppliers, clients and other stakeholders is also a fundamental principle.

INTERNATIONAL SOS FOUNDATION AND CSR

The International SOS Foundation, founded in 2011, improves the health, safety, security and wellbeing of people working away from home, internationally and on international assignments. It was started with a grant from International SOS, but works independently as a non-profit to conduct research and education on Duty of Care, Travel Risk Management and work health. The Foundation helps employers better meet their responsibility objectives by raising awareness of the need to reduce illness, accidents and personal incidents in the workplace and while abroad.

Below Right: Our Medical Supply Services provide a critical pipeline of pharmaceuticals, medical kits and medical consumables worldwide.

Left: Doctor and medic conduct medical evacuation in Tianjin.

In the community: LOCAL INITIATIVES IN 27 COUNTRIES

International SOS operates in 92 countries. Different cultures and local needs drive our support for ‘Healthcare and Education’ causes.

WORLD MALARIA DAY: PREVENTION AND EDUCATION TO STOP MALARIA

Malaria remains one of the world’s major infectious diseases. Although progress has been seen in the last decade, according to the World Health Organization, there are an estimated 216 million malaria cases annually and 655,000 malaria-related deaths. While the threat is very real, malaria is both preventable and curable.

In 2014, our Eastern Europe, Middle East and Africa region supported the ‘United Against Malaria’ campaign. With this initiative, we purchased 3,000 bracelets providing 750 mosquito nets to protect an estimated 3,000 children from the disease. During World Malaria day, we held widely-attended malaria education sessions at our offices, clinics and client sites throughout Africa. Highlights include:

- Visiting a local orphanage and donating mosquito nets in Port Harcourt, Nigeria.
- Providing 600 educational posters, pocket guides and 800 bed nets to a client site in Angola.
- Putting on malaria-themed dramas at Anadarko project site in Pemba, Mozambique.
- Providing 600 educational posters, pocket guides and 800 bed nets to a client site in Angola.
- Putting on malaria-themed dramas at Anadarko project site in Pemba, Mozambique.

WORLDWIDE REACH, HUMAN TOUCH.

Below: Malaria is transmitted by female Anopheles mosquitoes infected with the disease.

KTF (KOKODA TRACK FOUNDATION) AND NOSSAL SCHOLARSHIP: GIVING BACK IN PAPUA NEW GUINEA

80% of Papua New Guineans live in rural areas with little access to basic health and education services. Diseases such as HIV/AIDS and malaria are endemic; outbreaks of cholera are common. We work closely with KTF and help underwrite the Nossal Scholarship to improve life for people there.

KTF supports the indigenous people of Papua New Guinea through education, health and community service programs. This charity, founded in 2003, gives back to the local community in support of the selfless help they gave Australian soldiers in World War II. The Kokoda track is a 96km trail that served as a battleground between Japanese and Australian forces in 1942. International SOS has operated in Papua New Guinea since 1994 and nearly 90% of our 400 staff there are Papua New Guinean nationals.

- In August 2014, 12 of our employees walked the length of the track to raise $AUD 16,000 for the charity. Along the way, they offered medical care to villagers, donated books and provided critical medical supplies.
- In 2014, we delivered two-weeks of medical training to KTF health workers in our Port Moresby office.

Above: Malaria leaflets distributed throughout Africa.

Above L-R: 12 employees walked the 96 km Kokoda Track in Papua New Guinea and provided medical care and hygiene advice along the way; Dr Patricia Rarau, 2014 Nossal Scholar.

Below: Staff in Pemba, Mozambique hold up a bed net, a critical tool to prevent malaria.

Below: Malaria leaflets distributed throughout Africa.

LONDON AIR AMBULANCE: EMERGENCY ASSISTANCE IN GREATER LONDON

For 11 million people in England’s capital, London Air Ambulance provides specialist care by helicopter where it is urgently needed. This service transports and provides treatment to those who are critically ill or injured. Speed is critical in determining not only survival but the quality of life following recovery.

In 2013, London Air Ambulance flew on 1,818 missions to help save lives. Currently, London Air Ambulance’s helicopter flight hours are restricted due to limits in funding. Building upon synergies, International SOS’ UK headquarters formed a strategic partnership with this charity to share resources, medical expertise and to fundraise. Our employees have donated more than £GBP 11,000 via charity bike rides, raffles, bake offs and other initiatives. To this, International SOS has donated a further £GBP 25,000, to keep the London Air Ambulance flying.

Right: London Air Ambulance provides critical care to millions.
Community Health Activities IN PARTNERSHIP WITH CLIENTS

Not only do we focus on our own corporate citizenship, but we also help our clients meet their corporate social responsibility objectives. We do this by providing public health expertise at mining sites to reduce the health impact projects have on the local communities.

Mining projects are often in remote areas with endemic infectious illnesses, lack of clean water and limited health and transportation infrastructure. Diseases such as malaria, tuberculosis, cholera, STIs and HIV, filariasis and yaws can be rife.

Our client programmes include:

A STUDY TO ERADICATE THE TROPICAL DISEASE YAWS

Newcrest Mining funded a study at Lihir Medical Centre in Papua New Guinea led by International SOS. This research, in collaboration with the Centre for International Health Research of Barcelona, indicated how a new type of treatment for yaws could lead to eradicating the disease from an entire community. The study by Dr Oriol Mitjà was published in the New England Journal of Medicine.

Yaws is a tropical infectious disease that affects the skin and bones of people under 15 years old. It is transmitted through direct skin contact with an infected person. Left untreated, it can lead to severe deforming bone lesions. The study shows that by treating all eligible members of a community where yaws is endemic with antibiotics, infection rates for the community can fall dramatically.

The study concluded that if a community gets 100% treatment coverage, then the disease may be eradicated.

Yaws is classed by the WHO as one of 17 neglected tropical diseases disproportionately affecting economically disadvantaged populations. In 2013, it was added to the list of diseases endorsed for global eradication by 2020.

In addition, International SOS ran a highly effective filariasis eradication programme across the Lihir Island group.

In the Marketplace: FOCUS ON SUSTAINABLE OPERATIONS

International SOS has been in business over 30 years. During this time, we have taken a long-term view to creating sustainable operations so we are competitive and provide a livelihood for our employees. Below are a number of our business practices which contribute to our sustainability in the global marketplace.

INITIATIVE | SIGNIFICANCE | DETAILS
--- | --- | ---
Global Quality Charter | Continuous evaluation to ensure high customer satisfaction | The Global Quality Charter ensures that we deliver excellent healthcare, concierge and security assistance services to our clients.
| | | To gain the highest level of commitment from International SOS, the charter is led by our Group Chairman and CEO, and Group Medical Director.
| | | Our quality plan integrates our quality management system into the routine work of each Assistance Centre. It focuses on eight principles: Governance leadership, client focus, partnerships, continuous improvement, staff engagement, professional knowledge, information management and standardised work practices.
| | | Quality control measurements include: internal and external audits, clinical governance, business process review, customer and staff feedback and incident management.
| | | All eligible physicians receive continuous medical education to deliver the best care.
ISO 9001:2008 certification of key facilities and operations | Demonstrated commitment to operate consistently and efficiently | In addition to our longstanding internal quality management program, all 27 Assistance Centres have full ISO 9001:2008 certification.
| | | Our certification is through the Swiss Association for Quality and Management Systems (SQS), selected due to the medical expertise of their auditors.
| | | Our external audit programme assesses:
| | | Medical assistance and transportation
| | | Government service delivery operations
| | | Travel Security Services
| | | Flight desk
| | | MedFit and Healthcare Management Services
| | | Global assistance network
| | | Aspire Lifestyles
| | | Human Resources
| | | Information Technology
| | | Finances
| | | Sales and Marketing

Audit and accredit third-party providers in our Global Assistance Network (GAN) | Continual evaluation and surveys to ensure the integrity of our service providers | We rely on 72,000 third-party providers: Hospitals, physicians, air ambulances, dentists and security practitioners in our Global Assistance Network (GAN).
| | | Formal review in GAN database includes:
| | | Once a year audit of preferred providers
| | | All other providers audited through an onsite visit, every three to five years
| | | On an ad-hoc basis and per client contract, we conduct more frequent audits
| | | Database continuously records and raises the experience of patients and members.
| | | Annual reporting to KPIs ensures our provider network meets data quality requirements.
| | | Our customers entrust us with sensitive personal data such as medical data. We recognise our reputation and ability to serve our customers is dependent on our ability to protect their personal data.
| | | We have established a data protection steering committee responsible for the policy, procedures and operating standards to ensure compliance with changes in law. It ensures we meet best practices among multinational companies, recommendations published by governments aligned with developments in technology. In addition, we expect our service providers to handle data in similar way.
Data Protection policy | Establishes how we collect, handle, store and process personal data (including medical data) in accordance with regional and international regulations | Our data protection policy goes beyond the requirements of the law. It complies with:
| | | Laws in the countries where we do business
| | | United States’ Safe Harbour Framework and relevant provisions of HIPAA
| | | Binding corporate rules sanctioned by the European community’s data protection authorities
| | | Within 30 days of joining, all employees are required to receive eLearning on our data protection policies.
INITIATIVE | SIGNIFICANCE | DETAILS
---|---|---
**Contractual commitments to our customers include:**
- Authority and accountability for data protection
- Identification of data collection purposes
- Consent of data subject
- Collection limitations and accuracy
- Limiting use, disclosure, retention and destruction
- Security
- Openness
- Individual access and correction
- Challenging compliance and individual rights
- Transfers to a third-party and cross-border data flows
- PCIS (Payment Card Information Systems) Level 1 Compliance is part of Aspire Lifestyles’ business unit.

**Information Security policy**
Best practices and industry standards to keep information safe and secure
We recognise that information both in electronic and non-electronic forms needs to be protected from a range of threats to ensure business continuity.

- Our information security policy covers communications, technology, electronic information, software and hardware. Our policy and procedures are developed via our Data Protection Steering Committee.
- All employees of International SOS must comply with policy specifying:
  - Alliance to ISO/IEC 27002 standards
  - Background checks and security clearances for key and specific positions
  - Organisational security, systems development and maintenance, access control and compliance

**Business Continuity Planning (BCP)**
As a medical and security assistance provider, our clients and members require us to be fully operational in emergencies.

- All 27 Assistance Centres:
  - Seamlessly divert calls and cases from one assistance centre to another in an incident
  - Perform IT back-ups daily
  - Have uninterrupted power systems in place at all locations
  - Conduct disaster recovery testing at least twice a year
  - Updated BCP plans annually and perform mock scenarios to test readiness during:
    - Infrastructure failure
    - Single facility disaster
    - City-wide disaster
    - Surge in demand
    - Threat to reputation
    - Individual employees in danger
    - Influenza pandemic

**Evaluation and Accreditation of our Medical Suppliers**
Ensures the integrity of our medical supply chain
Our global policies and procedures require that our medical suppliers:
- Are reviewed every 12 months
- Are compliant with all applicable licensing regulations
- Are audited to ensure licensing compliance, good distribution practices and traceability including the quality of products and recall management

**Data Retention and Archiving policy**
Best practices and industry standards followed
All employees of International SOS must comply with policy specifying:
- Retention of data
- Archival of digital and paper-based media
- Destruction methodology for CR-ROMs, DVDs, tapes, mobile devices, portable drives, database records, backup files, hard drives and paper

**Security plan**
Comprehensive procedures to ensure the security of our facilities, personnel, information and equipment
Our policy outlines reporting responsibilities and actions to be taken in the event of an incident.
- It defines physical security: Access, responsibilities, access cards and keys, employee identity, visitor badges and display of badges.
- Additionally, it sets out document security, clean desk policy, printer security, secure destruction, IT access, transmission of sensitive information, encryption and password protection and security of mobile devices.
- Our policy outlines personal security, after-hours security, workplace violence and threats, pre-employment screening and separation procedures.
- Travel and event security includes travel risk management, land travel procedures, training and event procedures.
- The policy also describes enforcement and reporting requirements.

**RISK MANAGEMENT PRACTICES WORLDWIDE**

Our risk management system tracks incidents, accidents as well as internal and external feedback. As a single platform used at all assistance centres, clinics and Aspire Lifestyles operations centres, this system is integral to our overall quality management programme. Risk management examines major events - employee-related, client-related and data security issues that can compromise operations and minor incidents that present opportunities for improvement. It enables us to identify which issues are persistent or affect more than one site. From this we can develop remediation plans with key performance indicators to track progress. A good risk management system is a cornerstone to being a customer-centric organisation.

**ISO 9001:2008 CERTIFICATION AT OUR ASSISTANCE CENTRES**

We work within a three-year recertification cycle. During this period a number of different service delivery platforms are audited by an external auditor to show that we maintain high standards. Our ISO 9001:2008 certificate covers the following functions and business areas:

- **Operations**: Assistance services delivery; medical services delivery; pharmaceutical and medical consumable management; medical equipment maintenance, hygiene standards; medical licenses; transportation and flight desks; and MedFit health checks.
- **Human Resources**: Recruitment, hiring and training; licensing and background checks.
- **Finance and billing**: Sales and marketing
- **Information technology and data protection**: Government service delivery operations

**Adverse Incident Reporting**
Processes and procedures for the identification, assessment, reporting and management of Adverse incidents and Near Misses
We report on Adverse Incidents and Near Misses to monitor and better understand and address the risks that may affect our business.

**An Adverse Incident** is an unplanned event that causes or has the potential to harm any company personnel, asset (including information, finance, or reputation) or the environment. A Near Miss does not cause damage but had the potential to do so.

We conduct risk assessment to decide on which risks need immediate remediation and which can be managed less urgently.

**Risks comprises:** Clinical risks, security risks, information security risks, health and safety risks, business continuity risks and compliance risks.

Risks are reviewed at least annually or as work practices or situations change by appropriate business units.
In the workplace: CREATING A HEALTHY AND EQUITABLE ATMOSPHERE FOR OUR EMPLOYEES

We want to ensure that International SOS is a healthy and positive environment where employees can put their talents to best possible use. High employee engagement is important as it is enabling ethical and equitable conduct, diversity and inclusivity. We also aim to exceed our Duty of Care obligations to our workforce in the home office and when they work on assignment. We have an industry-leading systems and practices to prevent illness, injury and security incidents from affecting our employees.

<table>

</tr>
</thead>
<tbody>
<tr>
<td>Code of Conduct and Ethics policy</td>
<td>Sets ethical conduct for all our employees.</td>
<td>Our policy includes: Compliance with local and national laws and regulations, discrimination and harassment, fair dealing and integrity, information security, workplace health and safety, open door policy, whistleblowing and reporting of unethical behaviour. Within 30 days of joining all employees are required to receive eLearning on our Code of Conduct and comply with policy.</td>
</tr>
<tr>
<td>Individual Rights policy</td>
<td>Outlines the rights of employees in compliance with local laws.</td>
<td>Our Individual Rights policy includes: A commitment to provide fair and equitable remuneration to attract and retain the best talent in the industry, respect for the privacy of information provided to us by employees, customers and service providers, information security, fair dealing and integrity. Within 30 days of joining all employees are required to read and comply with our Individual Rights policy.</td>
</tr>
<tr>
<td>Cross-border travel policies and procedures</td>
<td>Policies and procedures to meet our Duty of Care responsibilities to our employees when they travel and work abroad.</td>
<td>All employees travelling abroad are required to get appropriate approvals. We develop health and security risk ratings and maps to monitor the level of travel risk globally. For travel to medium to extreme risk locations employees are required to: Use our Travel Risk Assessment tool with specific advice on the standards that must be applied for the trip, acknowledge they have received and read pre-travel briefing on health and security. Employees are required to comply with any and all required security and safety measures. Our TravelReady system enables oversight and compliance with cross-border travel policies and procedures. For high-risk and extreme locations, we use Active Monitoring via the Assistance App and TravelTracker. This tool shows when employees arrive in leave locations to give our travel and security managers better visibility on employee locations.</td>
</tr>
<tr>
<td>Occupational Health and Safety policy (OH&amp;S)</td>
<td>Governance of OH&amp;S at all facilities.</td>
<td>All employees are required to comply with our OH&amp;S management standards. These include: complying and conforming with local OH&amp;S standards, adhering to International SOS’ contractual obligations in regards to OH&amp;S matters, implementation and communication of OH&amp;S standards procedures and processes so we can maintain the occupational health and safety of employees, creating and implementing an emergency preparedness and response programme to ensure the adequate control of emergency situations.</td>

<tr>
<td>Accreditations and awards</td>
<td>Regional endorsements indicating we are an employer of choice.</td>
<td>Investors in People certification, United Kingdom in 2004, 2012 and 2015. Exemplary Employer of the Year from TAFEP (Tripartite Alliance for Fair and Progressive Employment Practices), Singapore 2014.</td>
</tr>
<tr>
<td>Global Engagement survey</td>
<td>Global programmes to track and improve employee engagement.</td>
<td>In 2014, we issued our first global employee engagement survey to measure and improve on engagement. We examined employee attitudes on job satisfaction, company loyalty and advocacy, having the right tools and equipment to do their jobs, work/life balance, internal communications, career and learning opportunities and relationships with peers and management. From this, each region identified areas and plans of action for improvement. Over 80% of employees took part. Annual global engagement surveys are planned for continued improvement.</td>
</tr>
<tr>
<td>Employee assistance programmes</td>
<td>Many sites have employee assistance programmes as part of benefits.</td>
<td>Employee assistance programmes support staff with personal issues including major life events, financial and legal concerns, substance abuse, emotional distress, health care, work, family and other concerns.</td>
</tr>
<tr>
<td>Wellness programmes</td>
<td>Many sites encourage wellness and health promotion.</td>
<td>Programmes may include: Sports clubs, walking and exercise promotion, healthy eating, vaccination, smoking cessation, bicycle riding/commute to work, provision of healthcare.</td>
</tr>
<tr>
<td>Diversity and inclusion</td>
<td>Active encouragement of employee diversity.</td>
<td>We actively look to increase and promote diversity within our internal talent pools. We also review opportunities to embed cultural awareness. Signed the “Charter de la diversité” (Diversity Charter) in Paris, France in 2014 to promote diversity and non-discrimination at work. Our French office employs more than 28 nationalities and is committed to open recruitment and training.</td>
</tr>
<tr>
<td>eLearning</td>
<td>Continual employee development and training initiatives.</td>
<td>Employee eLearning includes: Business Continuity Planning, Code of Conduct and Ethics, Pandemic influenza, Data protection and information security, Email etiquette, Security procedures, Road Safety – in conjunction with our Global Road Safety Partnership. Specific departments and functions also have additional annual eLearning requirements. We have developed 127 eLearning courses in total.</td>
</tr>
<tr>
<td>Other training and development</td>
<td>Mandatory CPR and AED training and on-the-job education.</td>
<td>We strive to improve our employees' skills and competencies through regular performance reviews, recognising potential, offering training, coaching and other professional development opportunities. All employees are trained in Basic Cardiopulmonary Resuscitation (CPR) and the use of Automated Electrical Defibrillators (AEDs). Medical staff are required to maintain training requirements as part of licensing requirements. Assistance Centre induction training is a minimum of six weeks and employees are required to receive two additional sessions per year.</td>

A comprehensive response to the 2014 EBOLA OUTBREAK

The largest Ebola epidemic in history began in early 2014 in Guinea, West Africa and was to have a devastating impact on the region. With no proven Ebola-virus treatment available, the disease is fatal in 25-75% of cases. Spread by bodily fluids and blood, it went on to cause more than 10,000 deaths. We had approximately 100 clients operating in Guinea, Liberia and Sierra Leone, countries that became extreme risk destinations. Our clients requested emergency and evacuation support.

Through our dedicated website and Ebola App, we made educational and preventive materials widely available: Posters, videos, recorded talks, colouring books for children and leaflets. Additionally, we locally distributed 14,000 educational playing cards with Ebola-prevention messages. Working with Translators Without Borders, we translated our Ebola posters into 24 languages including Krio, Mende and Themine, languages spoken in the affected countries. Also we made our maps of the outbreak, facts, charts and travel advice publically available.

For clients in affected West Africa, we developed barrier protocols, thermo-screening, built isolation wards and emergency response plans. Arcellor Mittal used our services to prevent infection in their employees. The company kept their Tolikda iron-ore mine in Liberia open, providing crucial jobs in the country stricken by the disease.

For our employees, we implemented our emergency response plans. Our protocols included: Crisis management, rolling communications on the outbreak and strict authorisation processes for staff going to the affected destinations. These employees were thoroughly educated, vaccinated, provided with proper equipment and quarantined upon return to home offices. Employees in neighbouring countries to the epidemic were given training and protective equipment, in case the outbreak spread.

We believe that an employer’s Duty of Care responsibilities does not stop at the home office. Our business practices address the mitigation of medical and travel security risks when employees travel and work abroad. Our proprietary systems rank country risk level by low, medium, high and extreme. Employees needing to travel to medium and higher risk destinations are required to get appropriate permissions, read up on the specific risks like crime, infectious disease and food and water safety. Employees are informed on vaccination requirements and malaria precautions and are encouraged to get inoculations and necessary prophylaxis. During the trip, our TravelTracker system helps security managers to communicate and provide emergency support to travelling employees and overseas staff should there be an incident. For high and extreme risk destinations, we track our employees in real-time via GPS to see when they check in and out of locations for enhanced travel security.

Below: Providing advice, information and response to travellers and expatriates from our Assistance Centres.

Below: Sign warning of Ebola in the Democratic Republic of Congo, which has suffered several outbreaks in years past.

Above: Health Risk Map shows levels of medical risk by country.
Environment: PLANNING FOR THE FUTURE

We are committed to meeting international environmental best practices for employees, customers and providers that are consistent with, and appropriate to, our business activities and operations worldwide.

<tr>
<td>Environmental policy</td>
<td>Governance on our environmental standards at all facilities</td>
<td>All employees are required to comply with our environmental standards. This includes: • Conforming with local environmental standards; where local law fails to provide an adequate standard, we apply our higher-level standards • Reporting and auditing all environmental accidents and incidents with the intent to create and implement corrective and preventative actions to prevent reoccurrence • Striving to reduce consumption of energy and other resources • Initiating a formal management review process based on assessing the environmental impacts our activities and those of our operations may have, to improve our performance and to ensure continual improvement • Workplace health and safety • Fostering awareness and respect for the environment to ensure optimal environmental protection in everything we do • Requiring suppliers and contractors to adopt similar standards and demonstrate visible and sustainable environmental management practices in the execution of their activities</td>
</tr>
<tr>
<td>Environmental practices</td>
<td>Practices to reduce paper usage, encourage recycling and minimise electricity</td>
<td>Our environmental practices vary by facility. We strive to reduce waste, paper and electricity consumption and recycle where possible. Most of our facilities: • Print in black ink by default • Donate and recycle electronics • Recycle plastics • Properly dispose of hazardous materials like paints and solvents • Use washable cups and plates instead of disposables We aim to reduce paper consumption by: • Deploying electronic management systems for operations management, human resources management and financial management to replace paper-based workflows and processes. We continue to make efforts to move away from paper-based workflows and processes and to meet or exceed all relevant regulatory requirements • Reusing envelopes and boxes for storage, providing collection of paper for recycling, reconsidering the necessity of printing or copying documents, using double-sided printing and copying, ensuring compliance with information security guidelines and reusing paper printed only on one side for drafts • Encouraging the use of electronic communications such as websites, e-newsletters and social media rather than for paper-based media • 34 offices have paper recycling schemes in place. Other facilities recycle glass, aluminum and compost • 27 offices recycle cardboard We aim to reduce electricity consumption by: • Maintaining air conditioning systems so they are more energy efficient. Our general recommended indoor temperature is between 23 and 26°C • Reminding employees to switch off the lights when they leave their workplace or meeting room, and only use lights when necessary. We also encourage the use of energy-saving lighting systems • 90% of our offices fix leaky faucets, toilets and flickering light bulbs within a day</td>
</tr>
<tr>
<td>Medical waste management</td>
<td>Measures to reduce medical waste</td>
<td>We have procedures in place at facilities to ensure waste disposal does not pose any risk to public health.</td>

Environmental practices AT OUR CHISWICK PARK HEADQUARTERS

We selected Chiswick Park, our London headquarters, in part because of the facility’s strong green credentials.

THE BUILDING FEATURES:
• Recycling of 90% of waste
• Capture of grey water, washroom taps to reduce water consumption and waterless urinals
• Automatic light shut off and monitoring light/heat usage to identify waste
• Roof-mounted solar panels to heat water
• Bike to work schemes
• Chemical reduction in cleaning, gardening and engineering activities

Below: International SOS office in Chiswick Park, London.

- $ : Materials
- $ : Hours

**COUNTRY** | **ACTIVITY** | **RESOURCE** | **HOURS** | **DETAIL**
---|---|---|---|---
Australia | Community Support | $1 | 4 | Employee contributions to Kokoda Track Foundation (KTF).
Australia | Community Support | $1 | 8 | Matching funds provided by International SOS to KTF.
Australia | Community Support | $1 | 144 | Gala dinner for KTF.
Australia | Community Support | $1 | 4 | Company donation to KTF in lieu of Christmas cards.
Australia | Education | $1 | 8 | Work placement for a KTF-sponsored student.
Australia | Education | $1 | 48 | Hosting a student work experience at our Port Moresby office with KTF.
Australia | Healthcare | $1 | 160 | Office accommodation for six students from the Ancher Leadership Programme.
Australia | Community Support | $1 | 560 | International SOS staff walked the Kokoda Track in August 2014 providing medical care and donated toothbrushes, toothpaste, medical consumables and primary school supplies.
Australia | Community Support | $1 | 144 | Gala dinner to support KTF.
Australia | Education | $1 | 18 | Nossal Scholarship for Papua New Guinean public health/ medical student.
Cambodia | Healthcare | $1 | 4 | Donated 45 boxes of syringes for use by Battambang’s Public Health Department serving a community with a high incidence of AIDS.
Cambodia | Education | $1 | 32 | International SOS provided a road safety session with Global Road Safety Partnership.
Canada | Community Support | $1 | 3 | Employees donated gifts to children and families in need through Neighbour to Neighbour charity.
Canada | Healthcare | $1 | 36 | Employees hosted bake sale for the Canadian Cancer Society.
Canada | Healthcare | $1 | 49 | Employees served lunch at Ronald McDonald house.
China | Education | $1 | 8 | Donated clothing and funds to help Stars and Rain Autism school.
China | Education | $1 | 8 | Halloween event to fund Stars and Rain Autism school.
China | Education | $1 | 8 | Christmas event to fund Stars and Rain Autism school.
China | Education | $1 | 66 | Employees ran 5k to raise funds for Right to Play, a charity that transforms children’s lives through sports and play.
China | Healthcare | $1 | 8 | Employees bought bracelets to support United Against Malaria.
China | Education | $1 | 192 | Employee-run auction to support Stars and Rain Autism school.
China | Education | $1 | 10 | Employees ran 10k to raise funds for Right to Play.
Czech Republic | Healthcare | $1 | 8 | Employees bought bouquets to raise funds for League Against Cancer.
France | Healthcare | $1 | 40 | In conjunction with Aviation Sans Frontières, we donated 12 kilograms of medicines and medical consumables to Grandir- Digement, an NGO helping imprisoned children in Madagascar.

**COUNTRY** | **ACTIVITY** | **RESOURCE** | **HOURS** | **DETAIL**
---|---|---|---|---
France | Education | $1 | 48 | Eight International SOS employees organised an initiative to help and support disabled people to walk 80 km of the Santiago de Compostela pilgrimage.
France | Healthcare | $1 | 320 | Employees participated in 6.7 km La Parisienne race against breast cancer.
Germany | Community Support | $1 | 40 | Employees ran 64 km to raise funds for child projects in Germany.
Germany | Education | $1 | 4 | Employees privately supported a children’s education charity project in Indonesia.
India | Education | $1 | 24 | 12 employees visited the Vanpool school for disadvantaged children and distributed blankets and food to over 170 children.
Japan | Healthcare | $1 | 4 | Provided stamps to Christian Medical Cooperation Services, a charity that supports medical volunteering in Asia and Africa.
Japan | Healthcare | $1 | 4 | Supporting Japan Committee for Vaccines for the World’s Children (JCV). Donated bottle caps that were exchanged for inoculations. We donated 8440 caps for 10 vaccinations.
Japan | Healthcare | $1 | 64 | Four employees volunteered to help clean up the Fukushima disaster area.
Japan | Community Support | $1 | 160 | Employees volunteered at Hallowe’en and Christmas events at a local orphanage and foster homes.
Japan | Community Support | $1 | 48 | Took orphanage and foster children to cup noodle factory for a noodle-making experience.
Kazakhstan | Healthcare | $1 | 24 | International SOS doctors ran four training sessions of eight hours each to train SOS Children’s Village employees in first aid skills.
Kazakhstan | Healthcare | $1 | 8 | International SOS doctors provided free health check-ups for WWII veterans.
Kazakhstan | Healthcare | $1 | 8 | International SOS paediatrician provided a health lecture at a girls’ secondary school.
Kazakhstan | Healthcare | $1 | 4 | International SOS doctor provided a lecture to SOS Children’s village on the prevention of paediatric hepatitis.
Kazakhstan | Healthcare | $1 | 4 | International SOS doctors provided a sexual health lecture to families for SOS Children’s Village homes.
Liberia | Healthcare | $1 | 8 | International SOS and AmorMilital donated 200 mattresses and 30 beds to Ebola treatment facility. Also we donated 20-ft container of medical supplies so Médecins Sans Frontières could set up the opening of an Ebola Treatment Centre in Monrovia, Liberia.
Malaysia | Healthcare | $1 | 120 | International SOS doctors provided medical health checks to locals.
Papua New Guinea | Community Support | $1 | 4 | KTF funds raised to finance the construction of a First Aid post and the employment of a community health worker for one year.
Philippines | Healthcare | $1 | 10 | Donated hygiene kits and multivitamins to 170 students of San Fernando Elementary School in Baler.
Philippines | Community Support | $1 | 4 | Fundraising to support rebuilding efforts after Typhoon Hayn in through Operation Blessing.
Russia | Community Support | $1 | 8 | Employees volunteered time to support Soul Bazaar, a collective of 70 local charities.
Singapore | Community Support | $1 | 20 | Held massage event to help fund Singapore Association of the Visually Handicapped.
Singapore | Community Support | $1 | 20 | Held massage event to help fund Singapore Association of the Visually Handicapped.
South Africa | Community Support | $1 | 24 | Employees bought and knitted woolen goods to raise funds for SOS Children’s Village.
South Africa | Healthcare | $1 | 47 | International SOS doctors provided health screens for 93 employees.
South Korea | Healthcare | $1 | 55 | Employees held bake sale to raise funds for the Korean Red Cross.
South Korea | Healthcare | $1 | 75 | Employees held bake sale to raise funds for the Korean Red Cross.
Spain | Community Support | $1 | 720 | Eight employees participated in an initiative to help and support disabled people to walk 80 km of the Santiago de Compostela pilgrimage.
Spain | Community Support | $1 | 40 | Children of employees of International SOS played a football match with the children of Aldeas Infantiles SOS.
